

Roxtec GH frame

The Roxtec GH frame with pre-drilled holes and standard sized flange is bolted to even structures. It makes it possible to maximize the amount of cables/pipes while minimizing the penetration footprint. The rectangular steel frame can be used with a GE extension frame in galvanized steel to cover the depth of a thick wall/floor.

- To be used with corresponding Roxtec components to form a complete sealing solution
- Attachment by bolting to steel or sandwich walls

GH 6x1 GALV

GH 6x2 AISI316

Galvanized mild steel
