## Features/Benefits

#### Low Attenuation

The low attenuation of CELLFLEX® coaxial cable results in highly efficient signal transferin your RF

## **Complete Shielding**

The solid outer conductor of CELLFLEX® coaxial cable creates a continuous RFI/EMI shield that minimizes

## Low VSWR

Special low VSWR versions of CELLFLEX® coaxial cables contribute to low system noise.

## **Outstanding Intermodulation Performance**

CELLFLEX® coaxial cable?s solid inner and outer conductors virtually eliminate intermods. Intermodulation performance is also confirmed with state-of-the-art equipment at the RFS factory.

#### **High Power Rating**

Due to their low attenuation, outstanding heat transfer properties and temperature stabilized dielect  $materials, \ CELLFLEX @ \ cable \ provides \ safe \ long \ term \ operating \ life \ at \ high \ transmit \ power \ levels.$ 

## Wide Range of Application

Typical areas of application are: feedlines for broadcast and terrestrial microwave antennas, wireles cellular, PCS and ESMR base stations, cabling of antenna arrays, and radio equipment interconnection
