

TRAYbloc

Made from 100% recycled PVC

- Roof-membrane friendly
- Trays easily fixed to blocks using self-tapping screws
- Elimination of hammer drilling to fix anchors
- No breakages

Dimensions 450(L) x 225(W) x 110(H)

- Optimum weight distribution over 0.1 sq ms

Weight 11Kgs

- Up to 60% weight reduction compared to concrete equivalent
- One man can carry two at a time, with ease, and within regulations
- Vehicles can carry up to three times as many blocks, subject to vehicle capacity
- Roof loadings significantly reduced

Features

- Block easily picked up using one hand
- Material non-biodegradable/UV stable
- Slots in the top of the block allow the fixing of ECObridge spans to produce a lightweight horizontal Cable Management System
- No need for any barrier between block and roof-membrane

INSTALLATION GUIDE

INSTALLERS PLEASE NOTE THAT WHEN TRAYbloc IS INSTALLED, THE SMOOTH SIDE SHOULD BE ON THE ROOF MEMBRANE AND THE POCKETS SHOULD BE TOPSIDE.

Just as illustration above
